

NaturaOnecoat

THE ONE AND ONLY

Natura Onecoat WOOD OIL 2K

General Features:

- One coat stain and finish for all interior wooden surfaces, including flooring, cabinets and furniture, providing extra durable protection against stains, water and heat.
- Compatible with most wood types, it maintains the natural appearance without forming a surface film layer.
- Fast drying: the wooden surface becomes touch dry within 1 hour after application.
- Outstanding yield and coverage, 360 mL (12.17 oz.) could cover 120-215 sq. ft. wooden surface depending on the wood type, sanding and application method.
- Available in multiple colors, all of which can be mixed together.
- Very low odor with a light oil scent.
- Easy application and maintenance without overlap.
- VOC Free and environmentally friendly.
- EN 71-3 certified and MEKO free.

Tecnical Specifications:

Basis	: Mixture of natural oils and waxes.
Physical form	: Liquid.
Density	: Clear: 0.93-0.95 g/cm ³ ; Colors: 1.00-1.40 g/cm ³
VOC (2004/42/CE,1999/13/CE)	: 0 g/l
Resistance to water (NEN-EN 13442)	: No visual or tangible changes.
Resistance to wear	: High abrasion and scratch resistance.
Shelf life (5-35°C)	: 2 years for unopened can.

Surface Preparation:

- Clean the surface thoroughly; remove any dirt and dust from the surface.
- Sand the surface with 80/120 grit screen for flooring and 180/220 grit for furniture.
- Vacuum clean the surface to remove the generated dust and remove the remaining dust with a microfiber cloth.

Application:

- The product is used as two components with a ratio of oil to hardener 3:1. Do not dilute the product.
- 360 mL of product could cover 10-18m² wooden surface depending on the wood type and application method.
- Stir well the product before use. Mix 3 parts wood oil 2K-A with 1 part wood oil 2K-B (Hardener). Stir well after mixing.
- The mixture has a pot life of 5-6 hours after preparation.
- Apply the mixture in one coat with a spreader, cloth, or an application pad.
- Remove the excess oil by a clean cloth after 3 minutes, until surface feels dry.
- Applied surface may be stepped on after 24 hours.
- It takes 5 days for full cure.

Safety Precautions:

CLOTHS THAT ARE SOAKED WITH OIL MAY SPONTANEOUSLY COMBUST. AFTER USAGE, WASH THE CLOTHS WITH WATER BEFORE DISPOSAL!
